

IN THE UNITED STATES PATENT & TRADEMARK OFFICE

*Part 8 #6A*

Applicant: STEPHEN NELSON )  
Serial No.: 09/037,315 ) Ex. Nasser Ahmad  
Filing Date: March 9, 1998 ) A/U 1772  
Title: "Method For Manufacturing )  
One-Way See-Thru Films" )

AFFIDAVIT OF STEPHEN NELSON

1. I, STEPHEN NELSON, am the inventor of the invention set forth in the above-referenced Application.

2. I have experience in the filed of one-way vision or see through vision panels of the type to which an image or graphic is applied.

3. Conventional practice has been to print images on these panels by techniques such as silk screening or litho graphics.

4. Ink jet technology prior to my invention was not applicable to the see-through films as the inks utilized do not adhere and are not absorbed by the film.

5. Attached hereto as Exhibit "1" is a perforated polyester film to which an image has been applied by ink jet printing.

6. The image on Exhibit "1" is of poor quality and further is not weather resistant. The ink has not adhered to the surface of the film.

7. Exhibit "2" is the same type of perforated polyester film which has been top coated according to my invention and then an image applied by ink jet printing.

8. The difference in resolution and quality is readily apparent. The resulting image is weather resistant and may be applied to a glass surface and left exposed for a reasonable time without significant degradation.
